

DEMAND TOUGH, DEMAND VAIL

Warranty/Liability For Backup Rippers

All parties involved must be fully aware:

Per the request of all O.E.M. crawler division engineers, concerning the installation and use of backup rippers; The added stress and strain may cause damage to the blade, hydraulics, frame or other structural parts on dozer blade system. Vail Products, in no way takes responsibility or liability for the installation of backup rippers on any dozer blade. Our warranty is limited to the structural components of the backup ripper and shank.

Liability, if any, is limited to replacement parts or material found to be defective, that will be furnished free of charge and shipped by transportation of our choice, F.O.B., our shop. No allowance or claim of any nature will be paid resulting from alterations or repairs of the product, including labor, and in no event shall seller be liable for any special, contingent or consequential damages.

Installation Instructions For Backup Rippers

A few specific models of tractors and backup rippers have been prescribed installation instructions. Please visit www.vailproducts.com to view the installation instructions. If your model of tractor is not listed in the suggested instructions list, our sales staff may have advice on the proper installation. At no time are the "suggested instructions" the only option. Vail Products is not liable for the positioning or quality/workmanship of installation for the backup rippers. Take the full movement of the blade and backup ripper shank into consideration when positioning the backup rippers on the blade. At no time should any part of the backup ripper housing or backup ripper shank come into contact with any part of the tractor's tracks, hydraulics, frame, body etc...
